HUBBUCK'S PATENT WHITE ZINC PAINT—ANNOUNCEMENT.

The MARINE Dealers in announce the following advantages:—

1st, where clean appearance is desired, and requisite this whiteness for many months, it is impervious, or collects vapours from which The White Paint in the hold of a ship, after discovering a sweet odour, is found to be as white as the year before, when newly painted. Under these and other circumstances, when every other paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the whiteness of its colour. Moreover, by virtue of its galvanic action on iron, it retains the paint, and forms an armature of the iron metals, which protects the iron from rust. Iron is now painted.

For the GENERAL PURPOSES of the decorative painter the "White Zinc Paint" has been found unparalleled in whiteness, clearness of colour, durability, and beauty of texture. It becomes so hard as to admit of polishing equal to the finest coach panelling.

For SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every interfering injurious or hurtful, but from its combining chemical qualities which render it a powerful corrective where contagious diseases have prevailed, furniture or buildings painted with it are at once disinfected. Painters and Painters' Public are assisted by its use as well as similar results to the occurrence of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children or the most delicate constitution. It becomes cheaper than common paints, from its spreading over a much larger surface; 1 cwt. of this paint covers as much as is usually covered by 3 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London.—Patent," as the style of the Manufacturers. A copy of which full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Dock.
